EASA Form 1 - Issue 2

- Note: 1. It is important to understand that the existence of this Document alone does not automatically constitute authority to install the part/component/assembly.
2. Where the user/installer works in accordance with the national relations of an Airworthiness Authority different from the Airworthiness Authority of the country specified in block 1 it is essential that the user/installer ensures that his/her Airworthiness Authority accepts parts/components/assemblies from the Airworthiness Authority of the country specified in block 1.
3. Statements in blocks 13a and 14a do not constitute installation certification. In all cases the aircraft maintenance record must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.

Maintenance Documentation Reference

CMM 25-60-59 REV 15. 15-09-2014.

Reason for Removal

OVERHAUL.

Findings

Overhaul duc.

Good overall condition.

Received packed.

Failed inspection due to damage: VALISE DELAMINATING

WT

Failed test: Power pack.

Cylinder life expiry:5/2018.

Work to be performed & parts to be replaces/Travaux à réaliser & pièces à remplacer

Work performed:

Cylinder and valve overhauled.

Inflation hose tested.

Overhauled and tested IAW relevant CMM's.

Parts replaced:

All MSO spares IAW relevant CMM's

Power pack.

Other:Valisc.
